

Year 6 Suggested Home Learning Tasks

Week 16

Week beginning
13.7.2020

| | |
|---|---|
|  | <p>Dear Year 6,</p> <p>This is the last home learning sheet of the year! I have given you some ideas to take you through the 6 weeks holiday.</p> <p>Before you start, just remember how brilliant you all are. You have made the past two year wonderful for me and I would like to thank you all and your parents for all their support.</p> <p>Go on to the next stage of your journey with confidence and know that we are all very, very proud of you! Don't forget to keep in touch and visit (when we are allowed) so we can talk about how you are getting on. You will smash it but don't forget to WASH THOSE HANDS!!</p> <p>Mrs. Bedworth x</p> |
| <p>Maths</p> | <p>We have access to My Maths and your task is to log onto it and explore. Try the teaching slides and remind yourself of some of the basic maths skills. You will need the school Log in details, which are</p> <p>School log in : stowlawn</p> <p>Password: cosine246</p> <p>Then, your own log in, which was sent out. If you have any problems, you can email me via Purple Mash.</p> <p>I have set booster packs for you to work through on times tables and general KS2 activities. You can also play the games on My Maths and complete anything else you feel you need to revise.</p> <p>Remember to keep practising those basic maths skills because you will need them in Year 7!</p> |
| <p>Reading</p> | <p>We hope you enjoyed your time at your new secondary schools and now have a better idea of what they will be working on in September with the book Wonder/Harry Potter or any other transition activities you have been given. Even if your secondary schools are not using the book Wonder, they would be good activities for you to complete as a guide to what to expect in September.</p> |
| <p>Writing</p> | <p>You do not need to buy the book as the activities have been designed so that you can complete them without it. The book was also made into a film but ask parents/carers first as it is a PG.</p> <p>We have put the transition booklet on the website and I have attached it to an email via Purple Mash. For those of you not at school, you should have received a copy in your report. Over the coming weeks, complete the activities in the transition book. If you find you need the book to complete the activity, then miss the task out. You could always complete it in September.</p> <p>Also, keep reading for pleasure over the holiday. You could read a book, poem, comic, newspaper – anything you enjoy. You could then keep a reading journal on what you have read using the activities we had in school for ideas.</p> <p>Try keeping a diary explaining what you have done through the 6 weeks now that we have a little more freedom. What would you like to do? You could even write an alternative ending to one of the stories you have read.</p> <p>The library usually runs a school holiday reading challenge, take a look and see if you'd like to have a go!</p> |
| <p>Topic</p> | <p>Again, we would like you to think about e safety. Remember to keep safe on line and on your phones. Keep in touch but BE KIND! Try not to stay on your games for too long, remember to get out in the fresh air too!</p> <p>You could make a time capsule about this time. You could add things about the Covid-19 outbreak, how schools were closed to some, how you coped, about your last year at Primary school, your transition days, your family – it's up to you! Remember you will be teaching your children about this time! Think about where you will put your time capsule and when you, or someone else, will look at it again.</p> |

| Science | <p>Look around you! What can you see? Everything is Science based but is it biology, physics or chemistry? Classify what you can see in the world around you, for example, gravity is physics, a nature hunt is biology, cooking is chemistry. Think about which scientific investigations you could conduct using everyday items. Some great websites to help you are https://pstt.org.uk/resources/curriculum-materials/Science-for-One https://www.whizzpopbang.com/science-experiments-for-kids/?gclid=EAIaIQobChMI4-7m5K7A6gIVSbTtCh1RCwB8EAAYASAAEgJG9PD_BwE</p> <p><i>Always remember to tell an adult what you are doing and ask for their help especially if you are heating anything up (or using all the ingredients in the fridge like my daughter!!!!)</i></p> |
|  | <p>Log onto Purple Mash and complete any activities set by your teachers. https://www.purplemash.com/sch/stowlawn</p> <p>Activity 1 – As we were going to London, and saw the pantomime, I have set you the challenge of reading the first chapter of Rick Whittington's Red Carpet. Read it then write the next chapter or chapters to finish the story.</p> <p>Keep using Purple Mash and complete the activities and games that interest you!</p> |
|  | <p>Log onto TTRS and improve your multiplication skills. https://www.ttrockstars.com</p> |
|  | <p>If you want to find safe online information suitable for children, you could try using Kiddle. Kiddle prioritises content that is child friendly and filters out most content aimed at adults and teens.</p> <p><i>Can you please be careful with some websites, advertisements and links linked to You Tube. Please access children friendly sites and report any issues or inappropriate sites/content to an adult as soon as possible so that they can be reported.</i></p> |

Remember to keep safe online.

If you see something that makes you feel worried or upset, tell your parents or carers.
